- Modern AI: ChatGpt and Bard AI for developing web applications
- Database: MongoDB

LANGUAGES

- HINDI
- ENGLISH

HOBBIES

- Reading books and watching educational videos
- Watching movies

ABOUT ME

I am a self-taught full-stack web developer. I have built MERN stack projects with full authentication using JWT tokens and deployed them on the internet via render.com. I can create advanced-level frontend applications but have intermediate-level proficiency in backend development. I can also work with the Next.js framework, albeit at an intermediate level. I have a deep passion for learning new technologies, especially within the IT sector.

PROJECTS (WITH LINKS)

E-commerce (full-stack):
